DETAILED ACTION

Claims 1-9 have been cancelled. Therefore, claims 10 –17 are pending in this application. Claims 16 and 17 are withdrawn from further consideration by the Examiner, 37 C.F.R. § 1.142(b), as being drawn to a non-elected invention. The withdrawn subject matter is patentably distinct from the elected subject matter as it differs in structure and element and would require separate search considerations. In addition, a reference, which anticipates one group, would not render obvious the other.

Response to Restriction

Applicants' election without traverse of Group I, claims 9-15 (in part), drawn to a method of treating or preventing diabetic disease using compounds represented by formula (I),

, and specific compound of Example 43,

3-[2-(2-Methoxyethyl)oxy-6-methylphenyl]sulfonyl-1-dimethylcarbamoyl-1H-1,2,4-triazole

, depicted in

page 44, of the specification is acknowledged. Because Applicants did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)). Therefore, the restriction requirement is deemed proper and made Final.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the

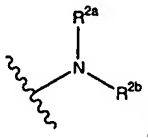

Art Unit: 1626

application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

The scope of the invention of the elected subject matter is as follows:

X^1 is N; X^2 is C; W is a single bond; R^{1a} represents optionally substituted C_1 - C_8 cycloalkyl

group or C_6 - C_{10} aromatic carbocyclic group; Z represents Z-1; Z-1 represents  group;

R^{2a} and R^{2b} independently represent C_1 - C_6 alkyl group or a C_2 - C_6 alkenyl group; n is as defined.

As a result of the election and the corresponding scope of the invention identified supra, the remaining subject matter of claims 1-6 are withdrawn from further consideration pursuant to 37 CFR 1.142 (b) as being drawn to non-elected inventions. The withdrawn compounds contain varying functional groups such as triazine, homopiperazinyl, thiomorpholinyl, propylaminyl etc, which are chemically recognized to differ in structure and function. This recognized chemical diversity of the functional groups can be seen by the various classification of these functional groups in the U.S. classification system, i.e. class 544 subclass 63(+) (thiomorpholine), class 540 subclass 450(+) (homopiperziny), class 544 subclass 180(+) (triazines), 548 subclass 400(+) pyrrolidines etc. Therefore the subject matter which are withdrawn from consideration as being non-elected subject differ materially in structure and composition and have been restricted properly a reference which anticipated but the elected subject matter would not even render obvious the withdrawn subject matter and the fields of search are not co-extensive.

Claim Objections

Claims 9-15 are objected to for containing non-elected subject matter.
